Senior Product Designer

Senior Product Designer operating in complex, regulated digital ecosystems, with experience driving growth, monetization, and high-impact user journeys in fintech and iGaming platforms. Skilled in aligning business strategy, user behavior, and scalable systems to deliver measurable product impact.

Selected Impact

- Led redesign of compliance-driven flows under regulatory change
- Contributed to revenue-oriented product optimization initiatives
- Operated in high-pressure, performance-driven ecosystems

EXPERIENCE

Senior Product Designer

PicPay

September 2023 - Present

Leading end-to-end design initiatives within a high-scale, regulated fintech ecosystem, focusing on gamified monetization mechanics, compliance-driven user flows, and performance optimization across Casino, Sportsbook, and Capitalization verticals.

- Drive growth and revenue-oriented product initiatives in collaboration with Product, Engineering, Data Science, and Compliance
- Translate regulatory and business constraints into intuitive, high-performing user journeys
- Influence product prioritization and experimentation strategy
- Lead redesign initiatives under tight regulatory and business model changes
- Contribute to measurable improvements in engagement and conversion metrics

Mid-Level Product Designer -

EstrelaBet

September 2023 - June 2025

Owned end-to-end design processes across two high-scale digital products, contributing to growth, user retention, and system consistency.

- Designed gamified flows and monetization-oriented experiences
- Optimized user journeys through behavioral analytics (Mixpanel, Hotjar)
- Strengthened Design System consistency across products
- Facilitated strategic workshops to align business and user goals

Product Designer

InpeaceApp

November 2022 - August 2023

Owned end-to-end design processes within a cross-functional squad, aligning product initiatives with company OKRs and measurable impact.

- Led discovery and validation cycles through qualitative and quantitative research
- Defined user journeys, flows, and prototypes for web and mobile platforms
- Structured and executed design experiments aligned with product KPIs
- Analyzed behavioral data and heatmaps to identify friction and optimization opportunities
- Facilitated workshops to align stakeholders around product vision and strategic priorities

UX Designer - freelancer

Martin Luz

May 2022 - November 2022

Led discovery and information architecture initiatives for client projects, applying research-driven methodologies to improve usability and content structure.

- Conducted qualitative research and applied techniques such as card sorting and journey mapping
- Built sitemaps, user flows, and interactive prototypes for web platforms
- Analyzed behavioral data (heatmaps and analytics) to identify usability gaps
- Facilitated workshops to align stakeholders and define content strategies

Previous Experience in Financial Services (2015–2022)

With focus on operations, process optimization and performance metrics.

SKILLS

- **Technical Tools:** Figma, Sketch, Maze, Zeplin, Framer, Basic HTML/CSS
